born to innovate

# EQUIP YOUR CAR TRAILER WITH LOKHEN!

# Lighting board,  
wheel chock & your  
fixing support

# GALASSY Small

## TRAILER LIGHTING BOARD

**Lighting board** is an innovative product, it is the first in its category to have variable length (1100 to 1400 mm) thanks to a sliding opening system. Its functional design allows a quick

installation and the disassembly of the plate without using bolts. Quality, injection technology, attention to details, functionality, strength and design: this is how a project becomes a product.

## WHEEL CHOCK & YOUR SUPPORT

Compact and robust, **Nano** is designed to fit a wide range of car trailers. Made of **high-quality black polypropylene**, it ensures a stable hold on all surfaces. Its ergonomic shape and small size make it easy to use and transport, requiring little space on the vehicle when out of use.

Thanks to its plastic support **Flaty**, **Nano** can be fitted on wheel guards or side rails.
